

BENJAMIN ARMOUR

/ SOFTWARE QA ENGINEER

Armourbl@buildverified.com | (513) 569-2759 | Liberty Township, OH | linkedin.com/in/ben-armour | BuildVerified.com | GitHub.com/LostInTyping

/ SUMMARY

Software QA Engineer with 4 years across manual and exploratory testing, Cypress automation, API validation, and risk-based test planning. Built the automation architecture and QA infrastructure behind software running on 4 million+ digital menu boards for major QSR brands. Owns the full defect lifecycle, communicates release readiness to stakeholders, and writes documentation that lets teams self-serve on quality. Comfortable shifting between hands-on testing and automation based on release risk.

/ CORE SKILLS

Automation & API: Cypress, Playwright, Postman, REST API validation, CI/CD (GitHub Actions), CI-friendly test design

Testing: Manual, exploratory, functional, regression, smoke, UAT, risk-based test planning, defect triage, release readiness

Tools & Process: Jira, QMetry, Confluence, Git, GitHub, GitLab, Docker, Linux CLI, Agile (Scrum, Kanban), Tableau

Languages & Stack: JavaScript, TypeScript, Python, SQL, Node.js, PostgreSQL, React

/ EXPERIENCE

STRATACACHE | *Software Quality Analyst II* Dayton, OH | May 2024 - Feb 2026

- Built a 150+ test Cypress framework from scratch, client-agnostic with shared test logic and per-brand configuration across 8+ QSR brands, cutting hours of repetitive manual regression per release cycle.
- Integrated the suite into CI as a merge-blocking quality gate with failure videos automatically delivered to the team, catching regressions before they reached staging.
- Led risk-based test planning for menu board launches across Tim Hortons, McDonald's, Taco Bell, KFC, and Burger King on a global platform supporting 4 million+ active menu boards.
- Validated 50+ REST API endpoints in Postman across content delivery and configuration services, catching mismatched payloads and silent integration failures between staging and production before customer-facing releases.
- Diagnosed environment-specific defects through device and server log analysis on embedded Linux/ARM media players in labs built with 1:1 staging-to-production parity, finding firmware-level rendering failures and resource bottlenecks invisible to UI testing.
- Tracked defect trends in Tableau and communicated quality risk and release readiness to engineering, product, and leadership; wrote Jira and Confluence test cases, onboarding guides, and verification checklists that let contributors test independently.

University of Cincinnati IT Solutions Center | *QA Automation Engineer* Cincinnati, OH | Aug 2022 - May 2024

- Built Cypress test suites across 4 criminal justice platforms for the Ohio Criminal Sentencing Commission, Ohio Supreme Court, and other state agencies, increasing regression coverage by 75% on high-stakes government systems.
- Validated legal document generation in the Ohio Sentencing Data Platform, a statewide system that standardizes felony sentencing data collection across Ohio courts, catching errors in required legal language and formatting through automation before release.
- Standardized QA workflows and test data structures across 9+ concurrent enterprise projects, improving defect reproduction consistency and supporting team scaling.
- Owned test planning and defect triage for each release cycle, coordinating with developers to validate fixes and communicating readiness to project leads before deployment.

/ PROJECTS

- NuvioTV** Open-source contributor to an Android TV streaming app (Kotlin, Media3/ExoPlayer). Built user-facing features: a stream metadata parser, configurable stream-card formatting, and playback timeout controls.
- BuildVerified.com** QA portfolio with test strategy breakdowns, automation examples, and NDA-safe case studies showing hands-on QA ownership and release-focused thinking. Next.js and TypeScript, deployed on Cloudflare Pages.

/ EDUCATION

University of Cincinnati | *BS in Information Technology*
Software Development and Game Design & Simulation

Cincinnati, OH | Aug 2020 - Apr 2024
GPA 3.85/4.00 | Magna Cum Laude
